

## Errata for *Population Genomics with R*

**Page xiv:** (fifth line from bottom) oppotunity  $\rightarrow$  opportunity

**Page 14:** (row describing `psmcr`) sequantially  $\rightarrow$  sequentially

**Page 176:** (in the paragraph after the first block of R lines) because of the ~~very~~ predicted

**Page 303:** the scales of the axes of Fig. 9.16 are wrong because of several small bugs in `psmcr` which have been fixed in version 0.1-2 of this package. Mostly, the axis scales were wrongly multiplied by  $10^4$ . The corrected figure is shown next page (slightly different because the bootstraps were re-run).
